GLASS BATCH

While we blend custom glass batch for many outstanding glass artists, we are particularly grateful to Jon Bush of Bush Handblown Glass in Lucerne Valley, CA for his advice and consultation over the years. Jon has generously shared some of his favorite batch formulas (see below). They are tested, proven and worth your consideration. If you have your own favorite, we are happy to prepare it for you (50 lb. minimum). Laguna packages all glass batch in moisture-resistant, plastic-lined bags to extend shelf life and prevent clumping.

GB-101D
SPGM #1
Similar to Spruce Pine 87, this glass has a long working time and fits most Kugler, Riechenbach, Zimmerman, and Gaffer® colors. Decolorized with neodymium and antimony.

GB-108D
SPGM #2
If you like Spruce Pine, you should try this batch. Contains 1% lithium along with some zinc and barium.

GB-100D
JB #1
This glass sets up slightly faster than SPGM #1. It has a long pot life and fits most Kugler, Riechenbach, Zimmerman, and Gaffer® colors. It is decolorized with neodymium and antimony.

GB-102D
JB #4
JB #1 reformulated to fit Riechenbach No. 5.

GB-107D
JB #5
JB #1 modified with 1/2% barium.

GB-109D
JB #6
JB #1 modified to fit most Reichenbach, Zimmerman and Gaffer® colors. A good all around batch.

GB-110D
JB #7
This latest modification of JB #1 is Jon Bush’s current studio glass. It has a long working time and fits most Kugler, Reichenbach, Zimmerman and Gaffer® colors.
