

Laguna Clay Co. GHS - United States

Section 1 - Identification

Product Name GSG788 SG-788 MIDNIGHT BLUE ^5 GLAZE

Common Names Ceramic glaze, dry or liquid glaze

Company / Laguna Clay Co.
Manufacturer 14400 Lomitas Ave.

City of Industry, CA 91746

(626) 330-0631 fax (626) 333-7694

info@lagunaclay.com

Emergency Number 911

Product UseNon-exhaustive list: pottery, artware, ceramic building materials

Restrictions on UseNone applicable

Section 2 - Hazardous Identification

Contains Crystalline Silica ≥1% Respirable

GHS label elements / Hazard pictograms

Signal Word: Danger

OSHA/HCS status Glaze mixture in dry powder form or if sprayed is considered hazardous

by the OSHA Hazard Communication Standard (29 CFR 1910.1200)

Classification of the

substance or

mixture

Carcinogenicity (inhalation) - Category 1A

Specific organ toxicity (Repeated Exposure) (Respiratory tract through

inhalation) - Category 1

Hazard Statement (H350) Cancer Hazard. Contains quartz (crystalline silica) which may

cause cancer. Risk of cancer depends upon duration and level of exposure

to the dust. Not an acute hazard.

(H372) Prolonged inhalation of dust may cause lung injury. Inhalation of

high concentrations of dust may cause mechanical irritation and

discomfort of the respiratory tract. Repeated exposure may have chronic

effects.

(H316 + H320 + H335) Can cause skin, respiratory, and eye irritation.

Page 1 of 8

Precautionary (P261) Avoid breathing dust/srpay

Statements (P262) Do not get into eyes, on skin, or on clothing

(P264) Wash hands thoroughly after handling.

(P270) Do not eat, drink, or smoke when using this product

(P273) Avod relase to the environment.

(P280) Wear protective gloves, eye, and respiratory protection.

GHS - United States

Section 3 - Composition / Information on Ingredients

Substances/Mixtures Mixture - A trade secret claim is made for this item.

Component	CAS #	Approx % by Wt.
Feldspar	68476-25-5	25-65%
Crystaline Silica - quartz	14808-60-7	10-25%
Dust		10-25%
Lithium Carbonate	554-13-2	<5%
Cobalt Carbonate	208-169-4	<5%
Brown Iron Oxide	1332-37-2	<2%
Calcium Carbonate	1317-65-3	<2%
Manganese Dioxide	7439-96-5	<2%
Kaolin	1332-58-7	<2%
Barium Sulfate	7727-43-7	<2%
Aluminum Oxide	1344-28-1	<2%
Brown Iron Oxide	1309-37-1	<2%
Barium Oxide	1304-28-5	<2%

Section 4 - First Aid Measures

First-Aid Measu	res
-----------------	-----

General First Aid Never give anything by mouth to an unconscious person. If you feel unwell, seek medical

attention

Eye Contact If eye contact occurs, rinse immediately with plenty of water. If irritation persists, seek

medical attention.

Skin Contact If irritation occurs, wash thoroughly with water. If it persists, seek medical attention.

Inhalation Move victim to fresh air in well ventilated area. If coughing or irritation persists, seek

medical attention.

Ingestion Consult physician and/or obtain competent medical assistance.

Symptoms and Effects, both Acute and Delayed

Eye Contact Prolonged contact with large amounts of dust may cause mechanical irritation. Glaze is

abrasive and may scratch eyes.

Skin Contact Prolonged contact with large amounts of dust may cause mechanical irritation.

Inhalation Inhalation of high concentrations of dry glaze dust may cause mechanical irritation and

discomfort. Long term exposure may cause chronic effects (see section 11).

Ingestion Large quantities ingested may cause gastrointestinal irritation.

Chronic Symptoms Repeated or prolonged exposure to respirable crystalline silica dust may cause lung

damage in the form of silicosis. Symptons will include shortness of breath, fever fatigue,

loss of appetite, chest pain, dry non-productive cough.

Safety Data Sheet (SDS) GHS - United States

Section 5 - Fire Fighting Measures

General Fire Hazards Glaze mixture in dry or liquid form is not flammable and does not support fire.

Extinguishing MediaUse appropriate extinguishing media for surrounding fire.

Chemical hazards

from fire

Glaze mixture does not contain hazardous decomposition products.

Protective actions and equipment for fire-fighters Glaze mixture and packaging can become slippery when wet. Fire-fighters should

wear appropriate protective equipment.

Section 6 - Accidental Release Measures

Clean-up Methods If appropriate, use gentle water spray to wet down and minimize dust generation.

Personal Precautions

and Personal

Protective Equipment

Wear appropriate protective equipment and clothing during clean-up. When dry sweeping use NIOSH approved respirators when dust levels exceed exposure

limits.

Environmental Precautions

Do not allow spills or wastewater to flow into sewer or waterway.

Emergency procedures

& Methods of Containment There are no emergency procedures required for this mixture. Place dry glaze dust in a sealed container for re-use or proper disposal.. For liquid spills, use suitable absorbent material and place in container for proper disposal. (see section 13 for

guidence on appropriate disposal methods.)

Section 7 - Handling & Storage

Precautions for safe

handling

Keep bags out of direct sunlight. Do not expose dry glaze to moisture until use. Do not expose liquid glaze to freezing. Use proper lifting techniques to avoid

physical injury.

Recommendations on the conditions for safe

storage

No special storage considerations, but keep in a dry, cool location.

GHS - United States

Section 8 - Exposure Counts / Personal Protection

Airborne Exposure Limits

Hazardous Ingredient	Wt. % Aprox.	CAS#	OSHA PEL* / ACGIH TLV*		
Feldspar	25-65%	68476-25-5	5mg/m3 / 2mg/m3 respirable		
Crystaline Silica - quartz	10-25%	14808-60-7	0.1mg/m3 / 0.025mg/m3 respirable		
Dust	10-25%		5mg/m3 / 2mg/m3 respirable		
Lithium Carbonate	<5%	554-13-2	15mg/m3 / total dust		
Cobalt Carbonate	<5%	208-169-4	0.02mg/m3 / 0.1mg/m3 respirable		
Brown Iron Oxide	<2%	1332-37-2	10PPM(STEL) / 5mg/m3		
Calcium Carbonate	<2%	1317-65-3	5mg/m3 / respirable		
Manganese Dioxide	<2%	7439-96-5	5mg/m3 / 0.02mg/m3 respirable		
Kaolin	<2%	1332-58-7	5mg/m3 / 2mg/m3 respirable		
Barium Sulfate	<2%	7727-43-7	10PPM(STEL) / 10mg/m3 total dus		
Aluminum Oxide	<2%	1344-28-1	5mg/m3 / 0.1mg/m3 respirable		
Brown Iron Oxide	<2%	1309-37-1	10PPM(STEL) / 5mg/m3		
Barium Oxide	<2%	1304-28-5			

Engineering Measures

Glaze in liquid form poses no inhalation health risk. Once glaze has dried, there may be dust generated by cleaning and working processes. In the event that dust is generated, use local exhaust ventilation or other engineering controls as required to maintain exposures below applicable occupational exposure limits (TLV).

Personal Protective Equipment (PPE)

Respiratory

Dust is generated when working with dry glaze or during spray application. To minimize exposure to dust and/or crystalline silica, cutting or sanding dry clay/glaze products should be conducted with sufficient ventilation. Respirable dust and quartz levels should be monitored regularly. Dust and quartz levels in excess of appropriate exposure limits should be reduced by feasible engineering controls, including (but not limited to) wet sanding, wet suppression, ventilation, and process enclosure. When such controls are not feasible, NIOSH/MSHA approved respirators must be worn in accordance with a respiratory protection program which meets OSHA requirements as set forth at 29 CFR1910.134 and ANSI Z88.2-1080 "Practices for Respiratory Protection". In most cases, a disposable N-95 Particulate Respirator is sufficient.

Eyes

Use of NIOSH/OSHA approved safety glasses with side shields is recommended. Face shields should also be used when dry sawing clay products. Wear tight fitting dust goggles when excessively (visible) dusty conditions are present or are anticipated. NIOSH recommends that contact lenses not be worn when working with crystalline silica dust.

Skin and Body

Use gloves and/or protective clothing if abrasion or allergic reactions are experienced.

Work/Hygienic Practices Avoid creating and breathing dust. Wear NIOSH/MSHA approved dust mask when working in dusty conditions. (N-95) Food, beverages, and smoking materials should NOT be in the work area. Persons using ceramic materials should wash thoroughly before eating, drinking, smoking, or applying cosmetics.

GHS - United States

Section 11 - Toxicological Information

OSHA, IARC, and NTP Carcinogen Classifications

Chemicals with Carcinogen Potential	CAS #	OSHA	IARC	NTP
Crystaline Silica - quartz	14808-60-7	YES	YES - 1	YES
Cobalt Carbonate	208-169-4	NO	YES - 2B	NO

IARC - International Agency for Research on Cancer

1 = Carcinogenic to humans

2A = Probably carcinogenic to humans

2B = Possibly carcinogenic to humans

OSHA - Occupational Safety & Health Administration

NTP - National Toxicology Program

Primary Route of Exposure: Skin, Eye Contact, Inhalation and Ingestion

Specific Organ Toxicity - Single Exposure

Target organs include ears, skin, respiratory system, and gastrointestinal tract.

Specific Organ Toxicity - Repeated Exposure

Causes damage to eyes, skin, respiratory system, and gastrointestinal tract through prolonged or repeated exposure.

Acute Short-Term Exposure Effects

May cause eye irritation, skin irritation, respiratory tract irritation, and gastrointestinal tract irritation. Inhalation of high concentrations of dry clay dust may cause mechanical irritation and discomfort. Long term exposure may cause chronic effects.

Chronic Long Term Exposure Effects

Silica has been classified by OSHA as a human lung carcinogen. Repeated or prolonged exposure of respirable crystalline silica dust may cause lung damage in the form of silicosis.

Effects of silicosis include bronchitis/chronic obstructive pulmonary disorder, increased susceptibility to tuberculosis, scleroderma (a desease affecting skin, blood vessels, joints and skeletal muscles), and possible renal disease. Acute silicosis can be fatal.

Related Symptoms

Symptons will include shortness of breath, fever, fatigue, loss of appetite, chest pain, dry non-productive cough.

Medical Conditions Aggravated by Exposure:

Individuals with pre-existing allergies, eye disorders, skin disorders, respiratory disorders and/or gastrointestinal disorders may have increased susceptibility to the effects of exposure.

Safety Data Sheet (SDS)

GHS - United States

Section 12 - Ecological Information (non-mandatory)

Ecotoxicity None Known **Biochemical oxygen demand (BOD5)** None Known Chemical oxygen demand (COD) None Known **Products of Biodegradation** None Known Toxicity of the products of Biodegradation None Known **Bioaccumulation Potential** None Known Potential to move from soil to groundwater None Known Other adverse effects None Known

Section 13 - Disposal Configurations (non-mandatory)

Personal Protection Refer to section 8 for proper PPE when disposing of waste material.

Appropriate disposal containers Standard waste disposal containers - no special requirements.

Appropriate disposal methods Disposal of this product should comply with the requirements of

environmental protection and waste disposal legislation and any

regional or local authority requirements.

The generation of waste should be avoided or minimized. Dispose of non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains, and sewers.

Physical and chemical propertiesDry clay dust should be placed in a sealed container or in a manner
that may affect disposal

that reduces or eliminates the release of the product. Moist clay has no

special requirements.

Sewage disposal Do not dispose of into sinks or toilets. Never dispose of this product

into a sewer system.

Special precautions for landfillsThere are no special precautions for disposal in a landfill. This product or incineration activities is non-combustible and is not suitable for incineration.

GHS - United States

Section 15 - Regulatory Information (non-mandatory)

TSCA - Toxic Substances Control Act - EPA

Quartz and other chemicals are listed in the TSCA Chemical Substance Inventory.

California Prop. 65 WARNING

This product contains a chemical known to the State of California to cause cancer. (Prop. 65 - California Health and Safety Code Section 2549 Et Seq).

SARA/Title III (Emergency Planning & Community Right-to-Know Act

This mixture contains no substances at or above the reporting threshold under section 313, based on available data.

Section 16 - Other Information (non-mandatory)

Definitions

ACGIH American Conference of Governmental Industrial Hygienists

CAS Chemical Abstract Service

CAL-OSHA California Occupational Safety & Health Administration

IARC International Agency for Research on Cancer
OSHA Occupational Safety & Health Administration
MSHA Mine Safety and Health Administration

NIOSH National Institute of Occupational Safety and Health

NTP National Toxicology Program

HCS Hazardous communication standard
OSHA PEL OSHA permissible exposure limit
STEL Short-term exposure limit
TLV Threshold limit value
TWA Time weighted average

Three types of TLVs for chemical substances as defined by the **ACGIH** are:

TLV-TWA Time weighted average - average exposure on the basis of an 8h/day,

40h/week work schedule.

TLV-STEL Short-term exposure limit - spot exposure for a duration of 15 minutes,

that cannot be repeated more than 4 times per day, with at least 60

minutes between exposure periods.

TLV-C Ceiling limit - absolute exposure limit that should not be exceeded at

any time.
